

The numbers at each corner and the center of your book cover are provided to help you make a straight fold as illustrated in panel 2.

Place book in center of cover (printed side up), mark and cut center flaps A and B. For best fit, cut to next widest line.

FLAP "A"

Cut to book size and fold under as shown. This makes the installation neater, longer lasting, and offers for more protection than other methods.

Place cover on table, printed side down. Fold in center flaps A and B. Place book on folded flaps.

Fold end over book. Next, fold over sides and secure with tape. The other end can now be secured in the same manner.

There ARE ABOUT 75 WAYS TO STOP SMOKING

1989 - DOCTORS OUGHT TO CARE

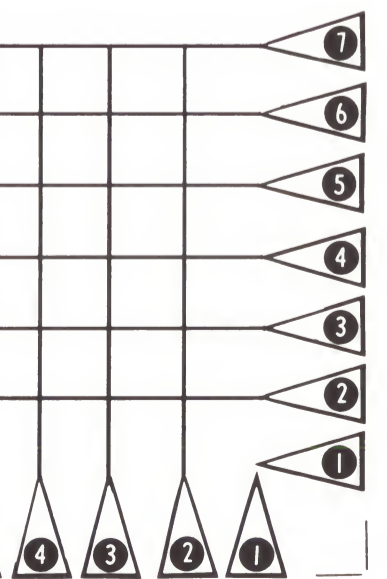

FOR KIDS' SAKE **SMOKING WHAT A DRAG!**
